

Shared Core

This directory is the reusable CS and GATE-style preparation layer shared across HPCL, IFFCO, MSTC interview support, and later exams.

How to Use This Layer

- Study here first when a topic overlaps across multiple exams.
- Keep exam-specific framing, sources, and schedules in the exam folder, not here.
- Update `.brain/Syllabus.md` and `.brain/WeakAreas.md` when actual progress or gaps change.

Current Priority Order

1. DBMS.md
2. COMPUTER-NETWORKS.md
3. DIGITAL-LOGIC.md
4. COMPUTER-ORGANIZATION.md
5. PROGRAMMING-CONCEPTS.md
6. DATA-STRUCTURES-ALGORITHMS.md
7. OPERATING-SYSTEMS.md
8. SECURITY-CYBER-LAWS.md
9. EMERGING-TECH.md
10. APTITUDE.md

Output Rule

For each subject, try to leave with:

- one compressed revision sheet
- one small set of dry-run or factual questions
- one list of error-prone traps
- one note about whether the topic is still weak
