

Security And Cyber Laws

Why This Matters Now

- HPCL explicitly includes Information Security / Cyber Laws.
- This is largely a factual and conceptual scoring area, so compression works.

High-Yield Topics

- Cryptography basics
- Authentication and authorization basics
- Firewalls, IDS, IPS
- Malware categories
- Secure coding practices
- Risk management
- Ethical hacking concepts
- Data privacy and compliance basics

Common Traps

- Confusing hashing, encryption, and encoding
- Mixing authentication with authorization
- Treating IDS and IPS as identical
- Overcomplicating cyber-law questions that are usually definitional

Done For Now Means

- one definitions sheet
- one secure-coding checklist
- 15 factual MCQs
