PROFESSIONAL SUMMARY

- Full Stack SDE with **2+ Years** of experience engineering production-grade, event-driven web applications and microservices using **React.js**, **Node.js**, **TypeScript**, **PostgreSQL**, and **CQRS/Event-Sourcing** architectures on cloud platforms.

TECHNICAL SKILLS

- Languages & Core:** TypeScript, JavaScript, Python, C++, SQL.
- Frontend:** React.js (18/19), Redux Toolkit, PrimeReact, TailwindCSS, Vite, Axios, React Hook Form.
- Backend & Architecture:** Node.js, Express.js, Microservices, CQRS, Event-Sourcing (Message Store), Knex.js, REST APIs.
- Databases & Search:** PostgreSQL, MySQL, Elasticsearch, MongoDB, AWS S3.
- Cloud, DevOps & Security:** AWS (S3, EKS, SES), Azure DevOps, Docker, Kubernetes, Keycloak SSO, OpenFGA (ReBAC).
- Tools & Testing:** Git, Postman, Jest, React Testing Library, Kibana, Datadog.

WORK EXPERIENCE

Berkadia | Bengaluru, IN
Associate Software Engineer

Certificate 
June 2024 – August 2026

ReservesAI – AI-Powered Document Processing

- Developed an **AI-powered** platform integrating **Azure Document Intelligence** and **LLM chat completions** for automated data extraction and financial analysis, containerized with **Docker** on **Kubernetes**.
- Architected an **Event-Sourced CQRS** backend via **Eventide Message Store (PostgreSQL)**, decoupling operations across 4 services (**React UI**, **Express API**, **Component**, **Aggregator**) with **MySQL** read models.

DMS – Document Management System

- Built enterprise loan document workflows using **React 18**, **TypeScript**, **Redux Toolkit**, and **PrimeReact**, featuring multi-field search, bulk operations, and **OpenFGA** role-based authorization with **Keycloak** SSO.
- Engineered **Node.js** REST APIs with **PostgreSQL**, **Elasticsearch**, and **AWS S3**; automated compliance **User Access Reports** (K8s CronJobs) and **Amazon SES** notification services with **Elasticsearch** audit logs.

CMS – Cash Management Service

- Engineered **Microservices** for cash workflows, implementing **Elasticsearch** schema migrations and scalable **REST APIs** using **Node.js** and **TypeScript**.
- Developed interactive dashboards in **React.js** with advanced filters and **Redux** state management, achieving **85%+** unit test coverage using **Jest** and **React Testing Library**.

STMicroelectronics Pvt. Ltd. | Gr. Noida, IN

Certificate 
August 2023 – May 2024

Project Trainee / SDE Intern

- Built the **eRFP-NPI** application from the ground up, managing Technical Gap Analysis (TGA) and a product portfolio of **500+** semiconductor quotations for **20+** external manufacturing partners, slashing manual processing time by **70%**.
- Implemented low-level modules and relational schemas to support **1 million+** price-quote records, boosting complex-query performance by **45%** and maintaining **99.8%** data integrity.
- Developed scalable services in **Node.js** and dynamic UI dashboard in **React.js** to serve **200+** concurrent users within **300 ms** average API response times.
- Resolved **30+** security findings using **BMC Helix** from the RMIS audit for FY 23–24 — eliminating all critical and high-severity issues to achieve a **100%** pass rate on follow-up penetration tests.
- Implemented delivery pipelines with **Jenkins CI/CD** (cutting deploy time by **50%**), managed **100+** Git branches, scheduled **50+** batch jobs via TWS, and implemented BDD in ALM to raise automated test coverage to **90%**.

PROJECTS

Codeial – Social Media Portfolio

Live  | **GitHub** 

- Built Codeial, a Git-managed social platform for programmers, leveraging **React.js**, **Redux**, **Material-UI** and **OAuth** to deliver a secure, modular and visually consistent UI.
- Implemented a scalable backend using **Node.js**, **Express**, **MongoDB** (via Mongoose) and MockBee to simulate RESTful APIs for authentication, posts, bookmarks, likes, search, and profile management.

ShopKicks – E-commerce Platform

Live  | **GitHub** 

- Devised a dynamic storefront with **React.js**, **React Router**, **Redux Toolkit**, and **Tailwind CSS**, implementing **JWT** authentication, **Fuse.js** instant search, and user dashboards for cart and wishlist management.
- Engineered a robust API layer using **Node.js**, **Express**, and **MongoDB** (via Mongoose), integrating **Stripe** for secure payments and **Passport.js** for role-based access control across checkout, order history, and address management.

EDUCATION

KIIT Deemed to be University, Bhubaneswar

CGPA: 9.60

B.Tech. - Computer Science Engineering

2020 - 2024

Bhagat Public Sr. Sec. School, Kota

Percentage: 77.40%

Intermediate

ACHIEVEMENTS

- Received **HI5 Award** for exceptional project contributions at Berkadia.
- Achieved **Runner-Up Award** at the STMicroelectronics Hackathon 2024.

INTERESTS

- Badminton, Fitness, Cycling.
